ALL-INCLUSIVE RATE FOR THE BUOY FIELD/GENOA BREAKFAST

Considering the need to establish a specific rate for mooring operations carried out at the buoy field as part of the construction of the Genoa breakwater, and taking into account the temporary limitation of mooring activities due to the construction of the infrastructure and the need to provide the Cooperative Society/Antichi Ormeggiatori Group of the Port of Genoa with the financial resources necessary to ensure the efficiency and organization of the service, the following rate has been determined:

Service Ranges	Monthly Number of Services	Monthly Rate (€)
a)	1 ÷ 80	62,202.00
b)	81 ÷ 130	72,569.00
c)	131 ÷ 210	77,752.50
d)	211 ÷ 240	88,119.50

The number of monthly operations does not the following are included:

- movements involving vessels equipped with their own mooring systems (spuds) that do not require connection to the buoy fields;
- movements due to any mooring changes of vessels already secured to their buoy fields, unless the Maritime Authority specifically provides for the use of mooring workers.

The above amounts are not subject to the surcharges referred to in Article 5 of this Decree.

Invoicing for services will be carried out by the Cooperative Society/Antichi Ormeggiatori Group of the Port of Genoa on a monthly basis and will be addressed to the agency appointed by the PerGenova Breakwater Consortium, even if the movements are ordered through other agencies.

A daily list of operations must be attached to the invoice, indicating the names of the vessels to which the services were provided.

Variations in the number of monthly services within $\pm 10\%$ of the upper or lower limit of the reference band do not entail changes to the application of the applicable tariff band. In this case, the compensation for each service exceeding the upper limit of the applicable rate bracket is set at €371.00.

If the variation in the same direction persists for more than a quarter, the new rate bracket will be applied starting from the fourth month, without retroactive effect.

The appropriateness of the operational and financial forecasts defined above is monitored quarterly.

The aforementioned rate remains valid until the completion of the construction of the new breakwater at the Port of Genoa.
